Deadlines(this Friday -- 10/03/2023):

- Code contribution;

- buddy-check;

We created new issues on GitLab and assigned each member to one/multiple of them.

The admin is not included in basic requirements as seen from the official backlog.

The project should have the fields of a class as private.

We decide that we should take care of the UI first and then look into drag-and-drop feature.

We decided that list should also have an interface that pops up (like the cards) for now.
